(I save my pride for love)

Ooh

Every since the day of graze when I was born
Even thru the nights of thought my heart was torn
I would always stand there right beside you
And save my pride for love!
Like when you face a broken heart to mend
Like when you share a love you must defend
Let me be the one whos there to guide you
I save my pride for love!

Flying high, here comes stormy weather
Hold on tight, we're in this together
Through the skies, we travel forever
Across the universe

I save my pride, oooh!
I save my love, oooh!
In the night I cross the ocean
To save my pride for love!
I save my pride, oooh!
I save my love, oooh!
In the night a strong devotion
I save my pride for love!

When you're ready for the future, come what may
When you're ready for the life that starts today
Let me be the one whos there to guide you
I save my pride for love!

Flying high, it comes stormy weather
Hold on tight, we are in this together
Through the skies, we travel forever
Across the universe

I save my pride, oooh!
I save my love, oooh!
In the night I cross the ocean
To save my pride for love!

I save my pride
I save my love
In the night I cross the ocean
To save my pride for love!

I save my pride
I save my pride
To save my pride for love!

I save my pride
I save my pride
To save my pride for love!

I save my pride, oooh!
I save my love, oooh!
In the night I cross the ocean
To save my pride for love!
I save my pride, oooh!
I save my love, oooh!
In the night a strong devotion
I save my pride for love
