Now it's decision time
Which one will stay which one will say goodbye
Just my luck to find
Someone who makes me want to leave her behind

We took the backseat, everyone was happy
We took the back where everybody laughed
We took the backseat, everyone was happy

Dreaming of you rushing up to me and
Saying this is where you want to meet
But I don't believe you

Cos last night you woke me up
We almost fell in love
But then you said
It is time for bed

We took the backseat, everyone was happy
We took the back where everybody laughed
We took the backseat, everyone was happy
