There's a place that we can run away to  
I've never been there but I still believe  
It might be in our hearts and minds but that doesn't  
mean it isn't real  
Won't you take my hand and lead me where I wanna be  
Cause I don't wanna be anywhere unless you're there  
with me  
Won't you take my hand and lead me where I wanna be  
Cause I don't wanna be anywhere unless you're there  
with me

Oh yeah lets run away lets start today quit your job and  
learn to play  
Sail away and never look back  
You and me fuck society what good is life without  
liberty  
I'm serious like a heart attack

There's a place that we can run away to I've never seen  
it but I still believe  
And the system calls it bullshit but we call it anarchy  
And if we have to fight for it I'm not afraid to die  
Cause I'm not scared of anything with you here by my  
side  
And if we have to fight for it I'm not afraid to die  
Cause I'm not scared of anything with you here by my  
side

Oh yeah lets run away lets start today quit your job and  
learn to play  
Sail away and never look back  
You and me fuck society what good is life without  
liberty  
I'm serious like a heart attack a heart attack
