Advanced medical technology  
Creating species never known to man  
Abnormal practice of cross insemination  
Among the Crong and Neanderthal

Surgical procedure  
Taking place in secret labs  
No sign of antiseptic drugs

Lack of awareness  
Preventing memory formation  
Blocking the conscious sensation of pain

Sustained in containment  
No way to leave  
Approached with a scalpel  
And forced to conceive

My mind still alert/responsive  
My body is drained  
The process has started  
Genetic code is obtained

They've planted the seed  
Generating new breed

Modification of conception  
Transformation taking place  
Termination of the unborn young

Suction-aspiration  
Contaminated embryo  
Abnormal cell growth keeps it alive  
Debilitated figure  
Unable to retain  
Incubation of a parasite  
Human host will be detained

New form of life  
Cannot be repressed  
Killing it's host  
As it tried to escape

They've planted the seed  
Generating new breed

Modification of conception  
Transformation taking place  
Termination of unborn young

Suction-aspiration  
Contaminated embryo  
Abnormal cell growth keeps it alive

Sirens go off  
All over the test lab  
No one shall let it be free  
The creature is savage  
Not yet fully grown  
Training has yet to begin

Sustained in containment  
No way to leave  
Approached with a scalpel  
And forced to conceive

They've planted the seed  
Generating new breed
