"Good Night Amanda"

Visit "[Good Night Amanda](#)" on MotoLyrics.com

Good-bye came - without a warning
I never thought - it could hurt me that way
You've been like - a new day dawning
a snowflake melting - on a sunny day
How can I live without you
God - I miss your smile

CHORUS

So Good night Amanda
Good night - I wish you well
I'll remember you
wherever you are now
I wish you good night - I wish you good night
My days were filled - with your sweet laughter
I'll always cherish - the your memory
And all the nights - we've been together
just holding you - so tenderly
Still I dream about you
God - I miss you so

CHORUS

It's so hard not to think about you - girl
I have built my world around you
but somehow it stopped to turn - without you

CHORUS

So Good night Amanda
Good night - I wish you well
I'll remember you
wherever you are now
I wish you good night - I wish you good night

So Good night Amanda
Good night - I wish you well
you'll be in my heart
until we meet again (until the end of time)
I wish you good night - I wish you good night
