"Let It Lift"

How can you take a step forward?
How can you leave?
How can you leave?
Don't tear your eyes off
Live it, you will make it
I inject regret and wrench my wings off
Past memories & fortune cards in my veins
Breathe again, I'll come to you feelin' high
In such days your prayers are to the Devil
Yes, my friend
Rain falls on everyone
Cry loudly to me
Won't you help to sing
You're the survivor

You picked up my bones
The reason of our encounter
Of our farewell
Inevitable
Let it lift you up

When the sun comes up
I'm gonna leave
You're gonna walk again
When the sun comes up
I'm gonna leave
