Let's go

There was a time where we would laugh and play to the
colours of the stars
Getting closer never seemed so far
There was a place where we could come and go
without a worry to pursue
Knew it then I wanted to break through
Well I know that everything you say just turns to shit
And I know that everything you do is wrong

My life is your life today
You think it's ok
To push me around
Well I'll slap you in the face
My life was your life last year
You think that it's swell
I'll get a fresh start

Just like that new car smell

We live for this
We'll die for this too
So cut the chord
A fresh start a new car smell
Front page and the fame
Your hearts fault to blame
Bleed out for your shame
A fresh start a new car smell

My life is your life today
You think it's ok
To push me around
Well I'll slap you in the face
My life was your life last year
You think that it's swell
I'll get a fresh start
Just like that new car smell
