Let's start this one off with some silence
Kids who have more wisdom than you

Swept up in fame with sex and the violence
Free to do what you want to do

Fading away, framing the day
Front of the pack and the wolves ate (chase?) you
Top of the game, the pinnacle dame
Front of the pack and the wolves ate you

Trapped, pigeon holed, the star of the sweetheart cast

Films and posters brand spanking (sparkling?) new

Burned down through the eye of a looking glass
Scrutinized for all that you choose

Break, break, and I'm breaking away
I'm gonna find myself and take it away
I'm gonna do everything that I wanted to do
Like fight the world with a remote in my hand
