you say... that you are full of anger
there is nothing to believe in you won't
believe in God that He is just a
mythical fairy tale then you can tell
me something what put life into the
lifeless? i say if you are full of

anger i say if anger is not in me God
has replaced it with fulfillment i
say what is better to believe? then
you can tell me something what put
life into the lifeless? what is the
reason we are here is it all
because of an accident?
