The moon is dancing  
On the blackened sky  
In this frozen land of doom

I will meet the winter here  
I feel the endless howling winds

I'm kneeling down  
Before your might  
I'm kneeling down  
Before your path

Ancient songs of olden gods  
Thundering the full moon sky

Oh winter night  
Oh, olden gods

Over the cold fog mountains  
Thy tower in the mist awaits

The moon is dancing  
On the blackened sky  
My sword is shining  
In moonlight...

I see awaking  
Forgotten realms  
Centuries from the past  
Will rise again...
