A chick always knows what you're goin' do  
From the minute they say hi  
To giving of their number  
From the moment they reply

So don't ever think you've got the upper hand  
On believing running games  
Cause your games been peeped even before you're  
speakin'  
Offer her your name, 'cause you'll have her like

Ooh, all giddy she'll be like, ooh  
They know they're gonna have sex with you, sex with  
you  
They know from the gate how long they're gonna wait

Man I hear them talkin'  
And the minute you walk in, they know  
They're gonna have sex with you, sex with you  
If it's the last thing they ever do

See it ain't about the jewels  
Or how much dough you got  
Not even bout the car you drive

But it's the feelin' she gets  
When you spit the right shit  
You can tell by the look in her eye

So at dinner when you kick it  
And you're tryin' to figure out if she's gonna give you  
some  
As long as you stay fresh and you're not acting  
pressed  
Most of all don't say nothing dumb and you'll have her  
like

Ooh, all giddy she'll be like, ooh  
They know they're gonna have sex with you, sex with  
you  
They know from the gate how long they're gonna wait

Man I hear them talkin'  
And the minute you walk in, they know  
They're gonna have sex with you, sex with you  
If it's the last thing they ever do

Make sure you say all the things that  
Keeps smile on her face  
Don't be too cool to express yourself  
Even though it might not be your way

If you're around your crew and you  
Happen to do something special  
Don't be afraid to tell her it's you  
And you won't regret it

So next time your tryin' to find the lines  
Or a clever thing to say  
Just be yourself and no one else  
'Cause your gonna get it anyway

All the ladies if you hear us say ?Yeah?  
Real soft like ?Yeah?  
And if you feel us let me hear you say ?Yeah?

'Cause we're up on the game that you're playin'  
We know what you're sayin'  
They know they're gonna have sex with you  
See they already decided  
They're just tryin' to hide it from you
