Never

In this world today

Love is scarce and far away

And your heart gets so afraid

To trust someone

All the times he let you down

There was no love to be found

Well it's not the end

There'll be time to mend

And you'll love again, oh

Chorus:

Never (never)

Never let a broken heart

Take a chance for love away

Don't never let it make you

Fall apart

Never

Never ever let the pain (never let the pain)

Take your need for love away

Never, no never

And I know it seems hard

Open up let down your guards

But you owe it to your heart

Try again

Oh comes a time when we must change

What the past has thrown away

Don't take the blame

Don't be ashamed

Throw your fears away

Chorus:

Never (never)

Never let a broken heart (never let a broken heart)

Take a chance for love away (oh no)

Don't never let it make you

Fall apart

Never (no never)

Never ever let the pain (oh no)

Take your need for love away (take it away)

Never, no never

Bridge:

I know (let go) don't be afraid

For you will never find

Another one you love again  
(I know) i know that you'll be sorry girl (oh so sorry)  
Be strong (be strong)  
Before it's too late  
Because forever is too long  
For you to live in pain  
Just don't give up  
Please open up  
To love, to love, to love  
Chorus(2x):  
Never  
Never let a broken heart (never let a broken heart)  
Take a chance for love away (take you love away)  
Don't never let it make you fall apart  
(no never, never let it make you fall apart)  
Never (whoa)  
Never ever let the pain (never, ohh)  
Take your need for love away (take it away)  
Never, no never

(so don't be afraid)  
Never  
(you'll love again)  
Never let a broken heart  
(no you don't have to live in pain)  
Take you chance for love away  
(it's never too late, you'll find a way)  
Don't ever let it make you fall apart  
(to loooove, whoa don't be afraid, you'll love again)

Never  
Never ever let the pain  
(no you don't have to live in pain)  
Take your need for love away  
(girl there's a way, you'll find a way)  
Never, no never  
(it's never too late)

Until fade
