Lea:

Be still my heart
Lately its mind is on it's own
It would go far and wide
Just to be near you

Brad:

Even the stars
Shine a bit bright I've noticed
When you're close to me

Lea:

Still it remains a mystery

Chorus (Both):

Anyone who seen us
Knows what's going on between us
It doesn't take a genius
To read between the lines Brad: ohh
And it's not just wishful thinking
Or only me who's dreaming
I know what these are symptoms of
We could be in love

Lea:

I ask myself why
I sleep like a baby through the night
Maybe it helps to know
you'll be there tomorrow

Brad: Lea:

Don't open my eyes Ohhh
I'll wake from the spell I'm under
Makes me wonder how Tell me how
I could live without you now

Both:

And what about the laughter
The happy ever after
Like voices of sweet angels
Calling out our names

And it's not just wishful thinking
Or only me who's dreaming
I know what these are symptoms of
We could be in love

Brad:
All my life
I have dreamed of this
But I could not see your face

Lea:
Don't ask why to such distant stars
Can fall right into place

(Repeat Chorus)

Both:
Oh, it doesn't take a genius
To know what these are symptoms of
We could be Lea: ohh
We could be, we could be in love

Brad:
Could be in

Both:
We could be in love
