I'd like to take you out on Friday night  
I bet you're beautiful by candlelight  
We'll grab a bite and dance the night away  
I'll try to have you home by Saturday

Hey, let me take you out to dinner  
You know there's nothing else I'd rather do  
Okay, except for maybe stay up all night, baby  
And have breakfast with you

It's up to you, girl, set the pace  
I'll be the gas, you be the breaks  
I can have you home before midnight  
Or twelve noon if it all goes right

Hey, let me take you out to dinner  
You know there's nothing else I'd rather do  
Okay, except for maybe stay up all night, baby  
And have breakfast with you

Everybody sleeps  
That's just so boring  
Why kiss goodnight,  
When you can kiss good morning?

Hey, let me take you out to dinner  
You know, there's nothing else I'd rather do  
Okay, except for maybe stay up all night, baby  
And have breakfast with you

Yeah, you know the only thing better  
A glass of wine and a table for two  
Just you and me making hot eggs and bacon, having  
Breakfast with you

Oh, breakfast with you  
I wanna make sweet breakfast with you
