Spreading like a plague throughout the human race.
Corpses are feasting and not leaving a trace.
The undead now walk the earth. Bringing human life to
extinction.
Glowing eyes emerging from the rivers mud,
They feast on us like cattle while they bathe in our
blood.
Ripping, tearing, eating us alive [x2]
Feasting, devouring, no way to survive [x2]
No humans left alive So breathe your last breath.
No place now left to run, so breathe in your last
breathe.
Maggots devour the innocent.
The guilty and the judge, the priest, every last human
defense, their ends soaked in blood.
Cities erupt in fire, the zombies continue to eat. No
humans left alive.
Just rotting mutilated meat.
Apocalypse has started.
