I see you there trying hard to disappear  
I can't believe all the things you say to me  
Be sure before you walk towards that door  
You can't back down lets get this over  
Time to stand  
It's time to see you fuck with me

You wanna feel it you wanna feel it lets go!  
You wanna feel it you wanna feel it lets go!  
You wanna feel it you wanna feel it lets go!

Face me one time too many times you lied  
It's true your through beware I'm coming for you  
This fight tonight the last time you will try  
You fear my name let's get this over  
Time to pay  
It's time to see you fuck with me

You wanted me so here I am  
Dig deep, in hale, do what you can  
Feel the pressure building now with every turn you take  
Put the pedal to the metal and I'll blow you away

Breath, take time to stare at me  
Yeah!

You wanna feel it, you wanna feel it  
You wanna feel it, you wanna feel it  
You wanna feel it, you wanna feel it

You wanted me so here I am  
Dig deep, in hale, do what you can  
Feel the pressure building now with every turn you take  
Put the pedal to the metal and I'll blow you away  
Break pace, sparks fly up and down the track  
Fuel burn, fire rage try to watch your back  
Stand up, stand strong, last through the night  
Be one, face all, race towards the light.
