

## Brandon Hines "Weather"

Visit "[Weather](#)" on MotoLyrics.com

Thinking it's spring and we planted a seed  
I sat back and watched our love grow  
And when you gave me your trust  
I promised I wouldn't crush  
Our love that grew out so slow

Thinking it's summer heat  
But couldn't keep your hands off of me  
I'll be making love to you all night long  
First you say you don't wanna leave  
When you're drifting away from me  
Baby, tell me it ain't so

You're changing like the weather  
There's no way I could know  
Whichever way that the wind blows  
Here we go  
You're changing like the weather  
Cause as soon as the clouds form  
I look around, and then you're gone  
Baby, you are so unpredictable  
You go from hot to cold  
I'm wondering which mood you gonna be in next, baby  
You're changing like the weather

Don't give me fall  
Since you've been through it all  
Then our love starts to fade away  
Like the colors on leaves  
You've been changing on me  
Feeling different from day to day

Then when winter came up  
You were as cold as ice  
We couldn't fix all the things our distance had broken  
Now you ain't warming up to me  
When I touch you, I start to freeze  
And it seems as though I can't warm your heart cause  
it's frozen

You're changing like the weather  
There's no way that I could know

Whichever way that the wind blows  
Here we go  
You're changing like the weather  
Cause as soon as the clouds form  
I look around, and then you're gone  
Baby, you are so unpredictable  
You go from hot to cold  
I'm wondering which mood you gonna be in next, baby  
You're changing like the weather

Ladies, if you're listening, hold your man  
Whether or not he has a plan  
Tell em that you love him  
You ain't let him go

All my dudes grab your girl by the hand  
Whether or not she makes you mad  
Cause love is more than words  
It's something that you show

For whatever  
Through the rain, the snow or the storm  
Baby we'll still be together  
Cause there ain't no other one out there  
And baby, no, never gonna ever leave you  
Even though you're changing, changing, changing

You're changing like the weather  
There's no way that I could know  
Whichever way that the wind blows  
Here we go  
You're changing like the weather  
Cause as soon as the clouds form  
I look around, and then you're gone  
Baby, you are so unpredictable  
You go from hot to cold  
I'm wondering which mood you gonna be in next, baby  
You're changing like the weather
