The sun stops shining  
And the sky starts falling  
And the world stops spinning  
And I'm right here  
I'm right here

Stars stop twinkling  
The ocean is dry  
The winds stop blowing  
And I'm right here  
I'm right here

Come what may, come what will  
Come whatever, I'll be right here still  
So when I get old  
The world gets cold  
One thing I know is  
I'm right here  
I'm right here (woahh)

[Chorus]  
No matter what the world decides to throw at me  
I'm right here  
There is only one thing I can guarantee  
I'm right here  
Who you can depend on and just where I'll be  
I'm right here [x2]

The Fans stop screaming  
And the checks stop coming  
My records stop selling  
And I'm right here  
I'm right here  
My waist starts cleaving  
And all my clothes don't fit no more  
But I'm right here  
I'm right here (yeah)

Come what may, come what will  
Come whatever, I'll be right here still  
So when I get old

The world gets cold  
One thing I know is  
I'm right here  
I'm right here

[Chorus]

Through my good days  
And through my bad days  
And in between  
When the kingdom is crumbling  
I'm still the queen  
So at my best or at my worst  
Cuz both I've seen  
Said it really don't matter  
I don't care  
Cuz the love's in me

Woah Woah [x3]

No matter what!

[Chorus]

I'm right here, I'm right here
