I have a question  
Can I take over our creation of love?  
Gimme your attention  
And give me all your trust  
Let me show you all of me

In additions to me  
Rhythm's the strength to our love  
So follow baby carefully and I'll be  
Everything you want in me and you'll see  
What we've been waiting for

Please touch me like this  
(Baby, do it like this)  
Please hold me like this  
(Hold me)  
Please love me like this  
(It makes me feel so good)  
I need you like this  
(Need you like this)

If we're goin' start touchin' each other  
We goin' do it like this  
I'll tell you where to kiss  
And you'll begin to kiss  
Baby I know how I feel

So just follow my lead  
Don't be afraid, you're at the wheel  
And I just wanna ride and enjoy it with you  
'Cause I know that you'll enjoy everything that I do  
Relax and I'll show you

Please touch me like this  
(I'll show you just what to do to me)  
Please hold me like this  
(Baby want me, every bit of me)  
Please love me like this  
(As I'm giving you a part of me)  
I need you like this  
(I need you like this)

Please touch me like this  
(Please touch me like the way I want you to baby)  
Please hold me like this  
(Please hold me like this)  
Please love me like this  
(Please love me like this, like this)  
I need you like this  
(I need you like this)

You plan to be with me  
Baby it's alright  
Just do right  
Let's just be clear on something  
This is all for you  
But there are rules  
If you wanna celebrate me  
And if you wanna keep me pleased  
This is how my love has got to be  
Baby, I really need you

Please touch me like this  
(Need you)  
(It will mean so much to me if you touch me right there)  
Please hold me like this  
(I need you closer to me)  
Please love me like this  
(This is the key to my love, so let me take you there)  
I need you like this  
(I need you like this)

Please touch me like this  
(Please touch me like this)  
Please hold me like this  
(Hold me, like this)  
Please love me like this  
(Woman need you to touch me, like I want you to care)  
I need you like this  
(Need you like this)

Please touch me like this  
Please hold me like this  
Please love me like this  
I need you like this
