[verse 1]

I read of all the magazines while waiting around.
you said you couldnt wait to see me, but you got stuck
in town
so turn off the phone now were finally alone its the
moment at the end of the day.
feel your touching is the sweetest your kisses are my
weakness i never want them to go away

[chrous]

I wanna feel you in my heart as I look into your eyes
no need to get busy so lets take our time and make
slow love slow love
and every minute that we have it goes to fast when i
show you how to rock it so this feeling lasts
and make slow love slow love slow love slow love slow
love all night

[verse 2]

Its just a few little things that you gotta know.
a girl will give you all of her heart when its happening
slow
I need a little laughter, the love will follow after lets
take this chance and steal away.
your kisses are delicious, and noone is gonna miss us
tonight i really want ya to stay

[chrous]
