"Get down" - Public Enemy  
I hear her so I gotta "Get down"  
You know I need her so I gotta "Get down"  
I need her so I gotta "Get down"  
You know I want her so I gotta "Get down"  
You know I love her so I gotta "Get down"

I'm obsessed with her, I'm at best with her  
Thickness surrounds me I'm blessed by her  
See I'm fallin' so deep deep for she be infatuation  
By the many many styles of she  
I wish I could undress her I wish I could caress her  
Like she does my soul but I am so much lesser  
She's always there for me when I need her like my  
moms  
Relaxin' all my drama I come into her arms  
It's unique that very few people understand  
How she came into my life and made me into man  
Many thresholds of negative stress stand in my way  
But when I'm weary she comes down from heaven slay  
If you was in the physical you would be the best  
With lips and eyes and hips and thighs and breasts  
I'd put you in uh to much to take at a time  
I'd push you from my mind I put you in a rhyme  
So everyone could get a little taste of your sweetness  
Too much passion for self delf mission is in  
completeness  
I treat this as my first and last only love  
My chocolate compation decendant from above  
In and out I glide and slide losing the rhythm  
God sent you here for me so this can't be forbidden  
But you are be on me and I think I gotta get over she  
Because what do you do when your baby doll is sound  
You can freak the tracks but you can't settle down  
The world brings me pain  
But she'll take that pain and use it  
She's underwater I guess women just can't love me like  
  
Muzik sweet muzik
