"Edge Of Summer"

Visit "[Edge Of Summer](#)" on MotoLyrics.com

I felt the warmth of light
Cast out from golden skies and
New souls are talking flight
The summer's sinking in
This could be the only one you get
And then it gets me
Falling off the edge of summer
And then it gets me
Fresh from the edge of the world
A sudden rush of air
Creates a weightlessness and
The feeling's everywhere
Cross eyed and painless and
This could be the only one you get
And then it gets me
Falling off the edge of summer
And then it's gets me
Fresh from the edge of the world
It's all that you get don't let it go away
If you're stuck in darker places
Twisted wrecks and broken faces
There is no past no tomorrow
In the moment all will follow
All will follow don't let it go away
A celebration for the effortless
Scattered energies collected into one breath
Break from all the tension and unrest
Like every second is the last one that you've got left
And then it gets me
Falling off the edge of summer
And then it gets me
Fresh from the edge of the world
It's all that you get don't let it go away
