It's really all nothing with you
I feel better on my own

If it-If it was ever something
Now it's nothin'
You should know
You said so

It's cool that you don't have a soul
No heart to ignore
The first rule of love says let it go
So hard

Oooh, you started again
You were not to understand
How it feels when you pretend
That we could be friends
And forget the better end
Just stop actin' like it never happened
(You will never know how to get close to me)
Oh-oh-oh
Just stop actin' like it never happened
(You will never know how to get close to me)
Oh-oh-oh

I'd like to think that you know better than to call me on
the phone
Late night drunk-dial
If it-If it you're telling me you're thinking twice
I think you're bullshiting, you said so.

If it-If it It's cool that you don't have a soul
No heart to ignore
The first rule of love says let it go
So hard

Oooh, you started again
You were not to understand
How it feels when you pretend
That we could be friends
And forget the better end

Just stop actin' like it never happened
(You will never know how to get close to me)
Oh-oh-oh
Just stop actin' like it never happened
(You will never know how to get close to me)
Oh-oh-oh

It's a? so
You have a face so
It's a? so
You have a face so

Oooh, you started again
You were not to understand
How it feels when you pretend
That we could be friends
And forget the better end
Just stop actin' like it never happened
(You will never know how to get close to me)
Oh-oh-oh
Just stop actin' like it never happened
(You will never know how to get close to me)
Oh-oh-oh
Just stop actin' like it never happened
(You will never know how to get close to me)
Just stop actin' like it never happened
(You will never know how to get close to me)
