"Powder Snow"

Visit "[Powder Snow](#)" on MotoLyrics.com

Tenderly ever powder snow
It's now falling from the sky
All on both my hands, don't pass me by
But soon it just melts away

Where can you be watching the snow?
Sure you must be stopping by
Maybe you'll remember yesterday
As you look up to this sky

Walking ever slowly
Hopping on so jolly
Tumbling away from me

Leaving me alone
Walking on the snow
Can't you see how much I love you

After all this while I think I remember
How that snow whitened everything
A long, long time ago our lips were together
Giving me the warmth
My only words are "I still love you"

Falling over me, this powder snow
So many, thousands of flakes
Just like you were here
So warm and bright
And yet so tenderly

Always talking to me
Looking in my eyes
Telling me your stories

Since I fell for you
I'm hanging onto love
I can't say how much I miss you

After all this while I still dream about you
White and bright, shining powder snow
A long, long time ago your fingers would touch me

Freezing all my heart for you, I still...

After all this time I think I remember
How that snow whitened everything
A long, long time ago our lips were together
Giving me the warmth
My only words are "I still love you"

Every time I speak your name
I think of how pure you are
Grant me my wish upon the snow
Take me there I'll be with you

('Cause) I still love you
