

Brighten "Carolina"

Visit "[Carolina](#)" on MotoLyrics.com

I'm so confused how to live without you
I'm not comfortable being all alone
And when I walk downtown I can see her everywhere
She's the streets at night
She's the morning light
And the main thing I think about at night
But we're better off this way, right

Carolina you're too far away from me
Why can't you see California's what you need
What can I do so I don't ever lose you?

And I know now that the world isn't over baby
Talk to me, how's your family?
And we're better off out in the world
And the two of us can be who we want to be
And she's quite a lot
I have to see, she is real, she's really not for me

Carolina you're too far away from me,
Why can't you see California's what you need
What can I do so I don't ever lose you?

Carolina you're too far away from me,
Why can't you see California's what you need
What can I do so I don't ever lose you?
So I don't ever lose you
So I don't ever lose you
