Oh, we've got a lot but a lot doesn't matter
It all just reminds me of before I had her
We could do a lot but we always can do better
And we like to think that we will be alright
If we just stick together (just stick together)

Baby, we could do better
Let's get out of this party town
Baby, we could do better
We're the selfish type,
You've got love on my mind

We'll move to New York
Take what we could get our hands on
We'll live like the movies with street lights to dance on
And we like to think that we could be alright being
Big city kids at night (big city kids at night) oh!

Baby, we could do better
Let's get out of this party town
Baby, we could do better
We're the selfish type,
You've got love on my mind

We should live... we'll never live again
We'll never die... if we never quit
We could own (we could own)...
Own that life(own that life)
We knew could... we know we should

Baby, we could do better
Let's get out of this party town
Baby, we could do better
We're the selfish type,
You've got love on my mind

Baby, we could do better
Let's get out of this party town
Baby, we could do better
