"Be Brave"

Visit "[Be Brave](#)" on MotoLyrics.com

You made the jump; you took the fall
And now you wonder was it even worth it after all
You lock your door; you hide your heart
And tell yourself it's easier to stay right where you are

(Well) No one said it would be safe
You sit it out or play your life before it's gone
Tell me what you're waiting on
Go on give it one more try
And if you laugh or cry it's okay
So roll your sleeves up, get your feet wet
Take a deep breath and be brave

You got one shot so live it loud
You got so much going on inside It's time to let it out
You might get hurt or you might win
But you'll never know until you put your heart out there
again

No one said it would be safe
You sit it out or play your life before it's gone
Tell me what you're waiting on
Go on give it one more try
And If you laugh or cry it's okay
So roll your sleeves up, get your feet wet
Take a deep breath and be brave

Take a chance it's in your hands

No one said it would be safe
You sit it out or play
Your life before it's gone
Tell me what you're waiting on
Go on give it one more try
And if you laugh or cry it's okay
So roll your sleeves up like you mean it
Get your feet wet step of the edge
Go head' dive in to deep end
Take a deep breath and be brave
