"Good Happens"

Visit "[Good Happens](#)" on MotoLyrics.com

It might be hard to get it from where you're standing
now

But right there at the bottom you'll be finding out

Good Happens, good happens

So you've had a couple bad breaks

Man I've been there too

I've been cut down, shut down no matter what now

I'm telling you good happens, good happens

And when you least expect it there's gonna be a
change

And all the pain you're feeling now will float away

It won't be long until you see the day

You'll look back on this and be laughin'

Good happens

Remember our friend Billy so lost in every way

We didn't think he'd make it but last year he got saved

Good happens, you gotta believe good happens

It wasn't too long ago I was looking for a way out

If I'd a gone in that direction I wouldn't be here to help
you now

Good Happens, Oh I believe good happens

And when you least expect it there's gonna be a
change

And all the pain you're feeling now will float away

It won't be long until you see the day

You'll look back on this and be laughin'

Good happens

You'll see all the dark clouds are passing

You'll look back on this and be laughing

Cause good happens

Good happens
