Wouldn't it be cool to act out a scene
From your favourite video off the screen
Do all the shit you ever wanted to
Be a hardcore motherfucker and kill a few
Two went crazy, random fire
Spraying the room, everybody must die
Locked loaded, bustin' caps
It's the trench coat Mafia, hide if you can
Welcome to their fantasy

Another video nasty
Room after room, on a killing spree
Kill anyone that got in their way
Black, white, red or brown
It didn't matter to them, they were all going down
What about the victims you left behind?
What about the victims?
What about them?
Killing Spree [x3]
Room after room on a killing spree
