I saw your smile from a mile away  
Cause of the glow you wear on your face  
They don't know what they say  
When they catch you out of your place

But it's alright  
I'm by your side  
Even when the tide  
Gets too high  
We can drown  
Into the ground  
When the waves come crashing down

What's your name  
Where ya from  
What did you do  
And why did you come  
I need a reason for your being  
I can't accept the truth  
God put you here for me

We will fall hard from the sky  
Drenched in water but still dry

I heard your heart from under the ground  
If your gone why does it sound?  
They don't know what they mean  
When they say I wont miss a thing  
About you
