Bang Bang
Hit the floor
Turn the knob
Walk though the door

Crash down
Lightnin' all around
This is how you left me
And I wont let you forget me

Leave, gone, through the door
See me dead to the world
You split my heart
Made me cry
Fit the pieces through a needle's eye

Whoo whoo
Got way down
She kicked this joint
And is loose in town

All around
It made no sound
This is how she left me
This is how she
Wanted to forget me

Leave, gone, through the door
See me dead to the world
You split my heart
Made me cry
Fit the pieces through a needle's eye

Lift me up
I need loves help
I could use a clue
To find myself
This is what you fet for lovin'
What you get is pain
And in the end
It must be all the same

All around
It made no sound
This is how she left me
This is how she
Wanted to forget me

Leave, gone, through the door
See me dead to the world
You split my heart
Made me cry
Fit the pieces through a needle's eye

Go go
Get away from here
I'll find another
Who will take me through the years
I don't need the broken heart
I'll get one new

Met her on the street
Passed her walking a beat
I said hey
She said ok
And I'm sewing up the wounds

Leave, gone, through the door
To get some life into the world
My hearts isn't split
I don't cry
Mended with string
Through a needles eye
