I was lost in an endless space
I couldn't find my way
I looked up and I saw your face
And heaven came crashing down

You are my universe
It only revolves around you
You're my Venus and Mars
The moon and the stars
In the velvet sky

You are my universe
My light and my darkness too
For better or worse you are my curse
My universe

Counting the stars in the dessert sky
Sparkle's in your eyes
Magic moments in the night
Shooting comets all around

You are my universe
It only revolves around you
You're my Venus and Mars
The moon and the stars
In the velvet sky

You are my universe
My light and my darkness too
For better or worse
You are my curse
My universe

Dance a little closer on the milky way
Wrapped around eachother we drift away
We are falling we are flying

Dance a little closer on the milky way
Wrapped around eachother we drift away
We are falling we are flying
Forever

You are my universe
My light and my darkness too
For better or worse
You are my curse
My universe
