Good evening to the sun
Might I be the only one
Who sleeps through melodies of morning
while they wake

This chirping lullaby
Brings my little dreams to life
In my sanctuary I become a child

So goodbye to the sun
Goodnight
All pain will be gone for a while
A while, goodnight

Heaven's windows are the stars
You were watching me from where you are
But we're divided by the light
When morning starts

So goodbye to the sun
Goodnight
All pain will be gone for a while
A while, goodnight

Goodbye to the sun
Goodnight
All pain will be gone for a while
A while

Goodbye to the sun
Goodnight
All pain will be gone for a while
A while, goodnight

Goodnight
Goodnight
Goodnight
