By the way the land is layin' think I'd be safe in sayin'  
That over the next hill we'll be home  
It's a straight and narrow highway, no detour and no  
byways  
And over the next hill we'll be home

From the prophets I've been hearin', I would say the  
end is nearin'  
For I see familiar landmarks all along  
By the dreams that I've been dreamin' there'll come a  
great redeemin'  
And over the next hill we'll we'll be home

And by the turn the tide is takin' I would say there's no  
mistakin'  
That over the next hill we'll be home  
There's a place that we are nearin' that so many have  
been fearin'  
And over the next hill we'll be home

When we get there we're all hopin' that we'll find the  
gate is open  
And there'll be a refuge from the comin' storm  
For the way's been long and weary but at last the end is  
nearin'  
And over the next hill we'll be home, over the next hill  
we'll be home  
Over the next hill we'll be home
