Good evening to the sun  
Might I be the only one  
Who sleeps through melodies of morning  
While they wake

This chirping lullaby  
Brings my little dreams to life  
In my sanctuary I become a child

So goodbye to the sun  
Goodnight  
All pain will be gone for a while  
A while, goodnight

Heaven's windows are the stars  
You were watching me from where you are  
But we're divided by the light

When morning starts

So goodbye to the sun  
Goodnight  
All pain will be gone for a while  
A while, goodnight

Goodbye to the sun  
Goodnight  
All pain will be gone for a while  
A while

Goodbye to the sun  
Goodnight  
All pain will be gone for a while  
A while, goodnight

Goodnight  
Goodnight  
Goodnight
