We came to big city from our little country town  
And every step she takes with you is down  
But you're as cold and heartless as your chilling winds  
that blow  
Before you freeze her heart please let go

Windy City you're haunting my baby  
With your bright lights and your avenues so wild  
Windy City turn loose of my baby  
If you don't give her back I lose my mind  
[ steel ]  
At night I walk your sidewalks and look in every bar  
I love her even though she's gone too far  
Your swinging doors stay open to keep her from my  
side  
And I'm on your lonely streets again tonight

Windy City you're haunting my baby...
