

Barcelona "Replicant"

Visit "[Replicant](#)" on MotoLyrics.com

biotech
genetic engineering
has paved the way
for the perfect place
the engineers
scientists
have managed to commence
our very essence
dna sequencing
character has been encoded
scientists
geneticists
have given me
such happiness

i've fallen in love with my replicant
biotech
genetic engineering
has paved the way
the scientists
the engineers
have managed to commence our very essence
i've fallen in love with my replicant
i've fallen in love with my replicant
