The night rushes in through the door  
Kids running across the floor  
Those guys aim it'll tear this town down  
And blow it into the sea  
Man that's alright with me  
'Cause I don't care anymore

She, she who is everything  
The fever that she brings  
She's got everything  
And I've got caught  
Wasting my life so bad  
Just looking for the facts  
Sometimes I  
Feel like I'm walking dazed  
The blood rushes in my veins  
I can hear it flow  
She lives in a world of dreams come true  
But she don't know like I do  
Not like I do  
'Cause I was nothing  
Over and over again  
Alone when the nights roll in, without her  
She's a miracle in diamond rings  
She has men who bring her anything she wants  
But they don't see  
That what she wants is me  
Oh and I want her so  
I'll never let her go  
Me, walking in the room  
Alone when the nights roll in  
Without her, without her, without her
