Well, maybe you dont need complications
This is a simple situation
Theres a chance that this could be the one, yeah
Oh, you may be wrong or you may be right
But this aint something you want to fight
Oh, let your feelings go
Cause you really need to know

What does it do to your heart
When she hangs on every word you say
Shes casting every single smile your way
What does it do to your soul
When you know that everything she needs
Is simply being around the air you breath
What does it do to your heart

Looking from the outside in
I see theres something deep within
You cant deny your lives are worlds apart
Sometimes life can be confusing
I tell you this aint no illusion
Let your feelings show
If you really want to know

What does it do to your heart
When she hangs on every word you say
Shes casting every single smile your way
What does it do to your soul
When you know that everything she needs
Is simply being around the air you breath
What does it do to your heart

What does it do to your heart
When you know that everything she needs
Is simply being around the air you breath
What does it do to your heart

What does it do to your soul
When you know that everything she needs
Is simply being around the air you breath
What does it do to your heart

What does it do to your heart
What does it do to your heart
