Pulling in to my hometown
It all comes back to me
A million memories crashing down
It all comes back to me
Thought i'd left this place forever
I was chasing bigger dreams
But at the city limit sign
It all comes back to me
Thought i would set this world on fire
It all comes back to me
Now i'm driving in on four bald tires
It all comes back to me
Everyone i meet remembers
Just who i used to be
The right and wrong
It all comes back to me
Bridge
Every road i've travelled, every dead end street

What i've lost and what i've gained
Every dream that's died, every tear i've cried
I've only got myself to blame
Looks like what goes around comes back around
It took some time but i'm finally learning how
It all comes back to me
Instrumental
To change my life and start again
It all comes back to me
To find the place where i fit in
It all comes back to me
With a little hope and courage
I'll have the strength i need
Whatever lies ahead
It all comes back to me
