I was standing the middle of nowhere you were heavy  
on my mind  
No-body in site seems like I'll never get a ride  
So I sat down the middle of somewhere to play your  
favorite song  
It just don't matter where I go now, now that you're  
gone

Cause you're the best place  
Honey you're the best place  
Baby you're the best place  
I've ever been

So I played for forty minutes it started raining and it  
was cold  
When that driver pulled over I didn't care where he was  
gonna go

He said son where you headed I said anywhere will do  
It just don't matter where I go now, now that I don't  
have you

Cause you're the best place  
Honey you're the best place  
Baby you're the best place  
I've ever been

So here I am the middle of somewhere asking lord  
what went wrong  
It just don't matter where I go now, now that you're  
gone

Cause you're the best place  
Honey you're the best place  
Baby you're the best place  
I've ever been
