Maybe I am lost and complicated

Tell me are you sick of it at all

Tied down, tore up, threw up, held up, sinking

You take me with you even though you're done

(Chorus)

Lovin you gave me a heart attack

Now I'm this long lost soul

Left with for these empty feelings

Now all I want is just to get you back

Cause it's a long life babe

And I'll be standing here just to see you fall

Are you dealing with a bad connection

Broken down from the love we lost

Stand up, hold up, back up, Roll up drinking

You take me with you even though you're gone

(Chorus X3)
