The counter culture left us with some redness in the eyes

Faded jeans and politics and shooters in the sky

Diagnosed a meniscus and I'm broken in the mind

The doctor said the Ritalin would surely work out fine

You're always there, you're always with me

You always fill me up, it's scary out there

You're always fair, you always miss me

You always bring me love, yeah

Flower rich emotion and I can't control my mind

A drop of antimatter and I'll blow up all mankind

Maybe I am jaded, or I'm mean or I am blind

Live in fear or God is real, there's nothing left to hide

You're always there, you're always with me

You always fill me up, it's scary out there

You're always fair, you always miss me

You always bring me love

It's not the same living on the edge

I'm not the same so go ahead and ride, ride, ride, ride

Ride, ride, ride, ride

You're always there, you're always with me

You always fill me up, it's scary out there

You're always fair, you always miss me

You always bring me love, never be scared

You're always there, you're always with me

You always fill me up, it's scary out there

You're always fair, you always miss me

You always bring me love, yeah, yeah, yeah, yeah
