Run, run for your life
Ah, run for your life

Keep on running
Run run run
Gotta run, gotta run, gotta run

Don't, don't turn around
Don't make a sound
Cause somebody's watching you tonight
Don't close your eyes
As darkness arrives
Cause, somebody's watching you

Look to the right (it could be nothing at all)
There in the light (it doesn't matter at all)
Coming into sight
Don't be afraid of the night

You'd better run (run)
Run for your life
The loneliness around you cuts like a knife
Do you run (run)
Run for your life
The shadow won't be far behind in the heat of the night
Run for your life
You's better run (run)
Run for your life
Run for your life

Run Run Run
Keep on running

And now as heroes pretend
With nerves at an end
Still saying never die alone
See how they fall
They're not that hard at all
Fear is behing their eyes

Wait for the break (it could be nothing at all)
It's all a mistake (it doesn't matter at all)

Only for you sake
Don't be afraid of the night

You'd better run (run)
Run for your life
The loneliness around you cuts like a knife
Do you run (run)
Run for your life
The shadow won't be far behind in the heat of the night
Run for your life
You's better run (run)
Run for your life
Run for your life

Keep on running, keep on running, ah ha
Run run run

And in a while another day
Will give your fear away and
You try to smile to make a day
But in the night you stay

Run for your life
The loneliness around you cuts like a knife
Do you run (run)
Run for your life
The shadow won't be far behind in the heat of the night
Run for your life
You's better run (run)
Run for your life
Run for your life
