How could you let it get so far  
Impeccable cloning shooting stars  
Impassive advice that feels so bad  
Wonders you dreamt you never had

La la la

Is it hard enough to say I'm sorry to yourself  
Wait a little bit I think I'm hungry for mental health  
Please forgive me if my mind was jumbled for a few  
years  
Open ears can't always lend and listen instilling fear  
Is it something you can read in magazines on politics  
or porno flicks  
Could show you something more to life  
To give it's twists and turns of spice  
If I was going to try to frame perspective ate from  
human plates  
I'd never win  
I thought I'd win  
I thought you'd take me with you if you went
