

Built To Last "Til The End"

Visit "[Til The End](#)" on MotoLyrics.com

Down with the old ways some say the glory days. When
it all seemed so true now it's full of lies. And shit I
despise so where the fuck are you. I stood the test of
time. From the longest line and I won't look back . I
stood the test of time. From the longest line and I won't
look back. I won't look back, I won't look back. Down
with the crew so why the fuck aren't you. We're gonna
unite the scene. All of our friends together till the end.
You know what I mean. I stood the test time. From the
longest line and I won't look back. I won't look back, I
won't look back. Tried and tested, maligned detested.
The roads been paved for you. Shut out and shut down,
dismissed and beat down. Sacrifices of the few. All of
our friends together till the end.
