(Verse 1)

Dreams of winter come alive  
This is our world  
I swear I saw right through your eyes  
And found out an answer

(Pre Chorus)

Cause it feels like emptiness to me  
Knowing this will end and its not up to me  
So close I crawl back to my room  
And write out an answer  
And I find

(Chorus)

That look in your eyes is haunting me  
You sneak out your room and we find a scene  
Then we kiss and I pull you close so I can

See behind your eyes  
But you drift away

(Verse 2)

Once high hopes now fall behind  
Welcome to my world  
So you can fall in love for a night  
And wakeup without her

(Pre Chorus)

(Chorus)

(Bridge)

I know you're not waiting for me  
I know you are all the same and  
I don't need this situation  
I know you're just playing games but still..

(Chorus)
