The choices made  
When we are all conscripted  
Fodder in the ear canals of any Revolution

And in the face of those who lie in state  
This isn't just to say

Anything  
To appease the pain of static days  
With the willing functionaries of  
An inundated mass  
Because the battle lines are drawn  
And we all make clear where we stand  
With every word and every hand  
We raise in opposition

Because what we; ve made -  
Yes, what WE'VE made -  
Shoved down the throats of friends  
Burning in the flames

So with Resistance  
And in Resistance:

A movement raised to realize a fate  
We'll live with the fire,  
Before we die with choice  
And it won't be a "false flag operation"  
When we consider the source  
And put the match to the fuse

Of our rage  
From me  
From you  
From us.
