Pulling  
From the darkness of the never world  
Girl I see ya  
Believe ya  
In your interpretation of what  
I'm breathing, believin'  
And try to manifest  
In this crazy mess  
Under reality just  
Without guiltiness  
Cause i know u're there  
til im leaving  
And there ain't no need for no grieving  
And no time for no regrets neither  
See it  
do it  
Love it  
Don't leave it  
Carry it around with you in little pieces  
Your soul releases  
when chillin'  
with your peeps  
And sharing your theories  
Of the universe species  
That u didn't do for no class  
at least that's not specifically  
asked  
u gotta tell'em like Jesus  
It's all for the Kingdom of God  
In which we're just  
Humble subjects  
Regardless of features  
Theories  
Different conjurings  
Of creatures  
And all of us that life live the leaders  
Love the eloquence of a concept proceed  
Proceeded only by a concept conceived  
Love the eloquence of a concept proceed  
  
Proceeded only by a concept conceived  
Inhale the air

Behold the string apart  
Trickling through the matter  
From within it's coming out  
Look the silent speech  
Hear and follow the route  
Tapping and let the pen and paper  
Take the journey without you  
Almost everything that's walking through this track with  
style  
Quinces of the moment focus, sit and catchin' it while  
Spinnin, growin, knowin, knowin, when you're graspin  
the now  
Focus not if I'm growing slower faster than though  
And crapped in the powerful counts of actual sound  
After the sound of how drastically chased after the  
vowels  
Capture profoundly accurately while he is handing it  
down  
Standing and astounding as seeded question answers  
leap out  
Keep how the moments bring you back to what I'm  
rapping about  
Peep out a grain of pornographs with screenin naturally  
now  
And composing everything dwelling and that it  
surround  
Aloosefest the when but never really apses some how  
cause we're  
Callin
