Fight the Blindness of Plastic passion  
Can't Give into the nights of fashion  
Lost inside you false intentions  
I life my head and raise my voice to be head  
Now the only way to push throught the filth  
that surrounds me  
Before I get sucked back into the grind  
Shredded and put together  
In a nice little package, for all to consume

I see right through you  
you're what i despise  
The age in which tomorrow  
Brings my heart inside to die

Forever wanting to find, another trend to  
follow behind  
I know the way to stop you

will be the way to set us free

I see right throught you  
you're what i despise  
the age in which tomorrow  
brings my heart inside to die

You've shown me what you're made of  
In just so little itme  
You've proven how pathetic  
It must be to live your life  
I can't stand by and watch  
you ruin mine  
last time you lied  
this time i'll watch you die

But I see right through you  
Although you're what i despise  
the age in which tomorrow  
Brings my heart inside to die
